For example my computer IP address is something like 12 0 1 4 and my iPhone is something like 12.

0 1 1 Cyberduck Ssh WindowsIn this Computers & Programming video tutorial you will learn how to FTP on a Mac via Cyberduck.. You are now connected to the server You can now drag and drop files to the server for uploading to your site.. Cyberduck Ssh WindowsI set up as best as I could (to be honest I don't know much about this kind of stuff).. Download the application and install it Then open it and click on 'open connection'.. In the server box type in ftp yourdomainname com, make sure the port selected is '21', then type in your username and password and click 'connect'.
